

RAE Systems Demonstrates Integrated Decision Support and First Responder Monitoring Tools at Fire Department Instructors Conference

Solutions for HazMat, Gas Detection and Public Venue Protection

RAE Systems Inc. (AMEX: RAE), a leading global provider of rapidly deployable sensor networks that enable customers to identify safety and security threats in real time, today announced participation at the Fire Department Instructors Conference (FDIC) that will be held April 19-21 in Indianapolis, Indiana. RAE Systems' booth number is 3712. Over 26,000 first responders are expected to attend this annual three-day event.

The company will feature LifeShirt®, a real-time responder, life-sign, monitor for high stress HazMat, fire, toxic gas and radiation detection situations. This is the first system that offers responder vital-signs and hazardous environment monitoring on a single, wireless, integrated-interface platform.

"We have been a major presenter at this premier event for first responder training for more than 10 years. This year we will showcase monitoring systems not just for incident situational awareness, but full awareness of the vital signs of each responder using our AreaRAE wireless network and LifeShirt," said Ryan Watson, Americas East Region Sales Director for RAE Systems. "FDIC is where first responders and emergency personnel come to learn about the latest technology to do their jobs of protecting us. We will also be featuring three of our newest products: AreaRAE Steel, GammaRAE II R and QRAE II."

Products featured for HazMat applications include:

- LifeShirt, a durable, lightweight chest strap with embedded sensors that can be integrated with the AreaRAE(TM) to monitor the vital signs of first responders
